

# FAMILIES NEEDED FOR RESEARCH IN *AUTISM*

As part of my graduate program in Geography at McMaster University, I am carrying out a study titled

## **Toward an Autism-friendly Home Environment**

The study explores the physical elements that affect the quality of life of autistic children and their families in home environment and how can these elements be designed (or modified) to create an autism-friendly home environment.

I am looking for families with a child with autism (3 to 16 years old) that has at least one sibling and has been living in their home for at least one year to take part in the study by completing an online Questionnaire posted on:

**<https://www.surveymonkey.com/s/6NCJV22>**

Completing the questionnaire will take approximately (15-20) mins
