

The Simons Simplex Collection

leading an international investigation into the mysteries of **AUTISM**

We are currently enrolling families to join our important study.

To learn more about this study, please contact:

umacc@umich.edu
www.umaccweb.com

Families eligible to participate consist of:

- only one child with an autism spectrum disorder (ASD), age four or older;
- one or more siblings without an ASD, age four or older; and
- unaffected biological parents who are willing to participate.

Eligible children with an ASD will receive a behavioral assessment and all family members will donate blood, a source of DNA.

Interviews conducted in Ontario. Each participant receives a \$50 gift card. Parents receive a Research Report of their child's cognitive, language, and behavioral testing, supervised by a psychologist licensed in Ontario.
